

The sequence consists of eight rectangular frames arranged horizontally. Each frame is divided into equal-sized smaller rectangles. The number of small rectangles in each frame increases by one in each step: 2, 3, 4, 5, 6, 7, 8, and 9. The first frame has 2 rectangles, the second has 3, the third has 4, the fourth has 5, the fifth has 6, the sixth has 7, the seventh has 8, and the eighth has 9. This sequence illustrates the progression of fractions from $\frac{1}{2}$ to $\frac{8}{8}$.
